REVOLUTION IN ELECTRONICS

**E-SOFT**  
**THE REVOLUTIONARY PRODUCT**  
INDIA'S NO.1 ADVANCED SMART WATER TECHNOLOGY

# Commercial Applications

- Restaurants
- Malls/Super Markets
- Hospitals
- Hotels/Banquet Halls
- Educational Institutes
- Water Parks
- IT Parks
- Swimming Pools
- Sports Clubs/Stadiums

## What is E-SOFT?

It is the most advanced computerized smart water treatment which is completely based on programmed software for generating particularly two types of low frequency modulated digital signals from the ingeniously designed circuits.

The technical name of E-SOFT is Electro Hydro Enhancer which works on the principle to break the big sized ions (calcium & magnesium) into the microns and makes it neutral by changing the molecular structure of carbonates and bicarbonates (scales).

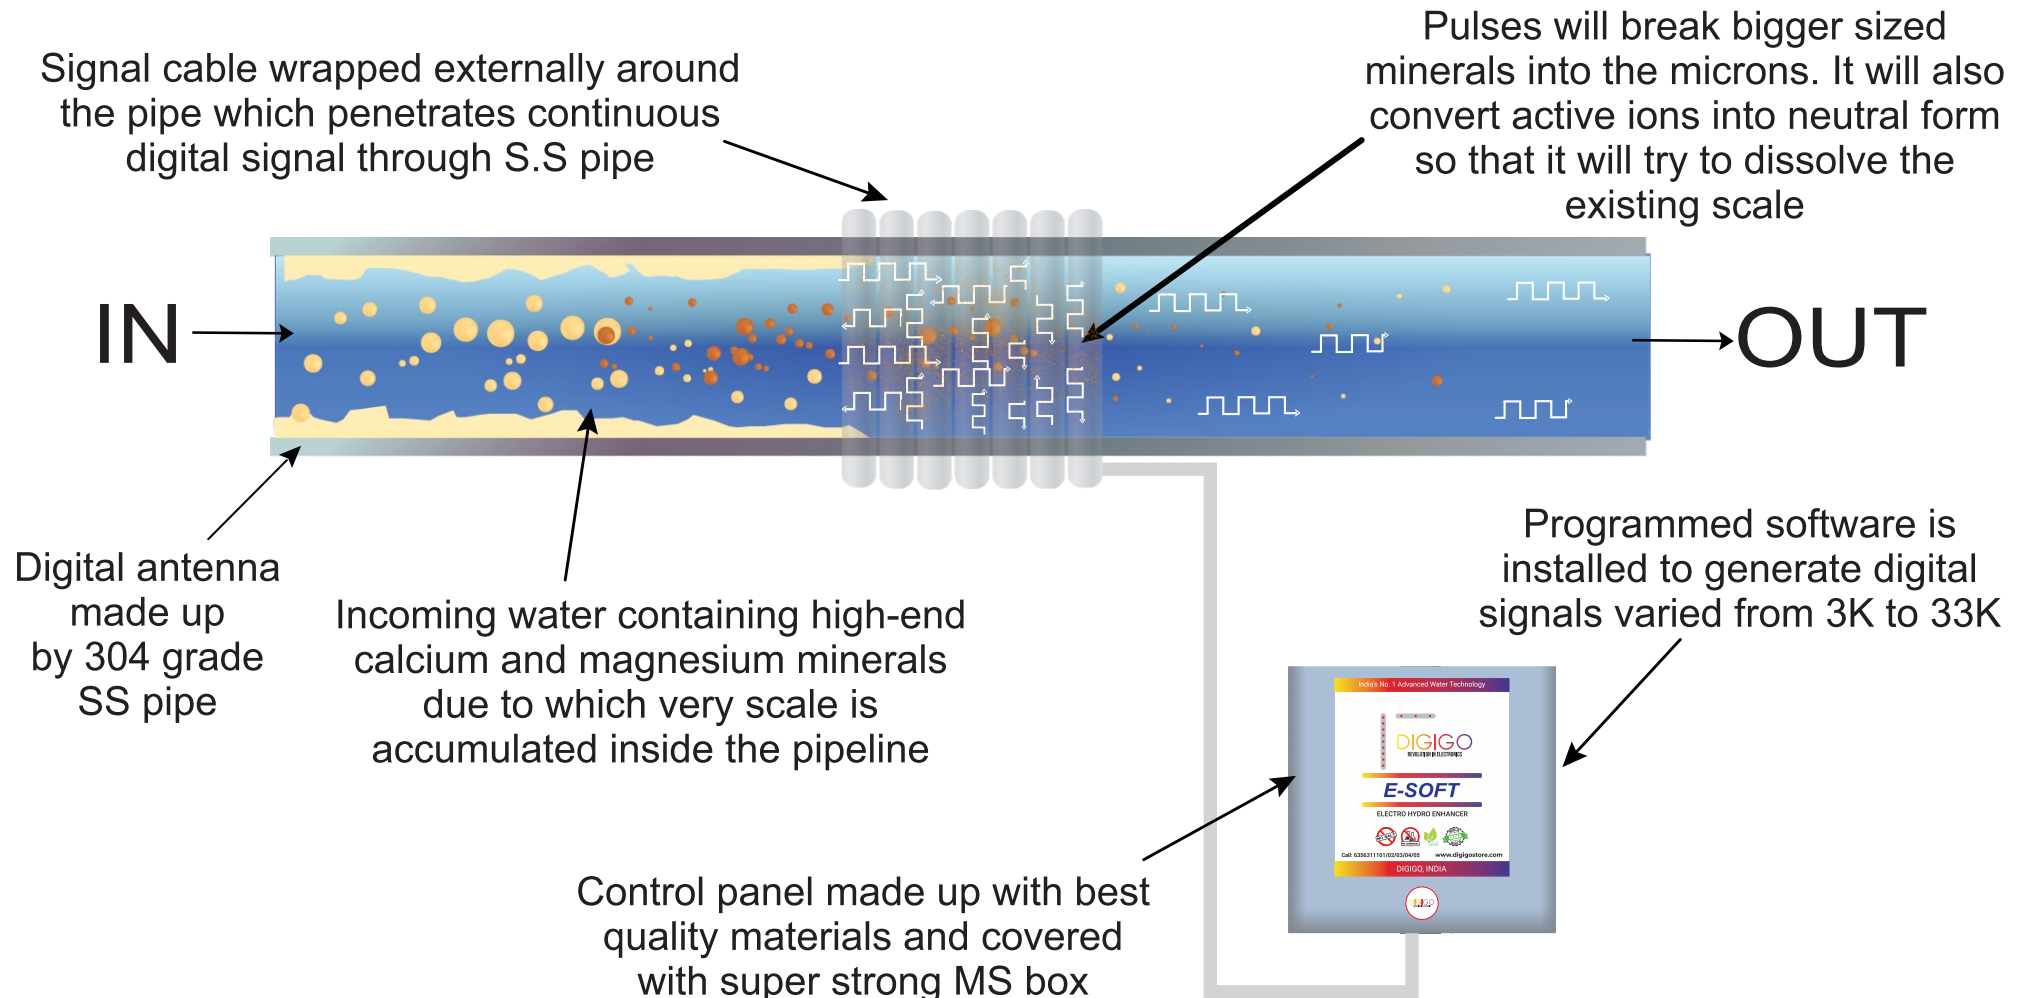

## Why E-Soft?

All commercial applications go through a large quantity of water on a daily basis. Hotels, Hospitals & Institutes use more proportion of water in the kitchen, washrooms and bathrooms. The swimming pool and spa also use water in significant amount.

At most of these places, hard water is used and it creates all lime scale-related problems. It increases overall maintenance and repairing expenses. The E-soft can provide numerous benefits to a wide range of commercial buildings. It can help to extend the life of electrical equipments, reduce operational cost, make your campus more hygienic and will do a variety of other things.

# E-SOFT TECHNOLOGY

## **E-SOFT has multiple benefits**

### **Stable Flow of Water**

The entire plumbing system of the building will be scale-free so that the pressure of water coming from the tap will increase gradually.

### **Cost-effectives**

E-soft can also remove existing scale from the whole pipeline so that there is no more need for scale cleaning chemicals or re-plumbing works for such type of problem which will save your huge amount of money in the future.

### **More Efficiency**

Due to scale-free heating coil and tank, the life of heating equipment will be surely increased and it will be perform more efficiently.

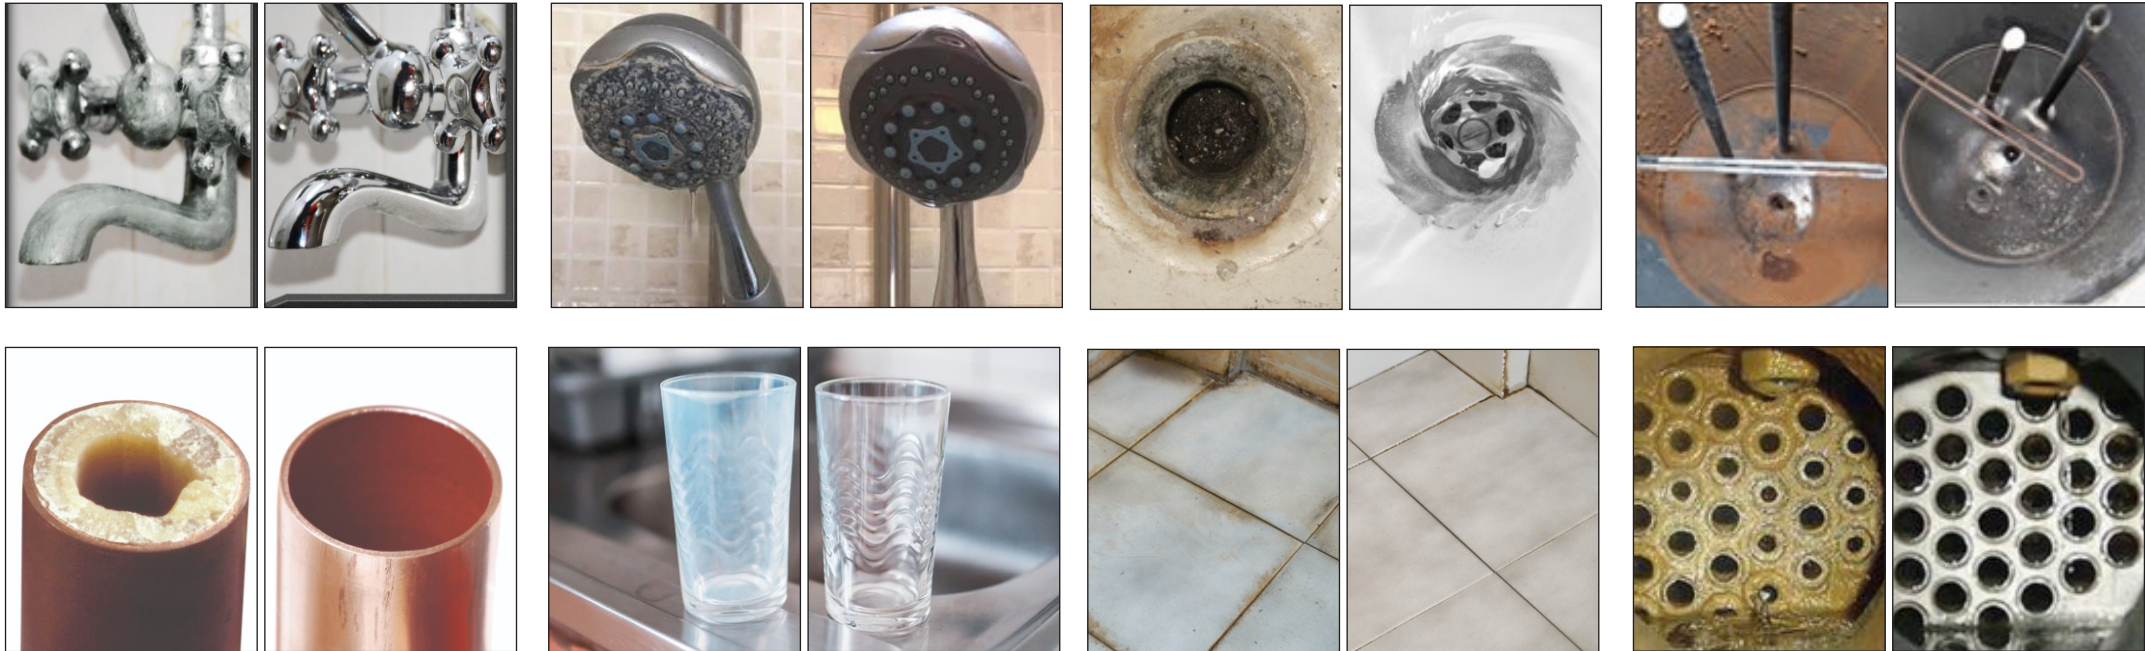

### **Operational Cost-cutting**

If your hot water appliances use soft water than it will save energy up to 30%. By using E-soft use of cleaning agents also will be reduced up to 70%.

### **More Hygiene & cleanliness**

With the help of E-soft your floor of building, bathrooms, swimming pool & your utensils will remain stain-free and will always look crystal clear and new one which will make your whole building most hygienic and the cleanest one.

## Before and After

*E-soft is always helpful to the operation of **ETP & STP** plants.*

***"A single E-Soft save environment exactly equal to the environment affected by one SUV Car running on the road throughout the year."***

# How does the E-soft best technology for the Swimming Pool?

Whether you manage a public swimming pool at a hotel, theme park, community center, water park or a homeowners who has a backyard oasis, you understand well the time, money and energy it takes to properly maintain a swimming pool.

Several benefits of using E-soft for swimming pool:

- Amazing water clarity
- 50% of chemical saving
- Ideal for sensitive skin
- Improves filtration
- Reduces back washing
- Less maintenance

# How does the E-soft best technology for the landscaping?

Water is the essence of life for plants. Lush green plants and gardens add grace to your commercial buildings.

## Several benefits of using E-soft for Garden:

If we give soft water to the garden than the roots of plants and grass will be much more stronger ever which will give more growth to it and will make it more healthier.

Your entire landscape will have

- Less yellow & more green leaves.
- Save water up to 20%.
- Improves quality of flowers
- Reduces use of fertilizers.
- Decreases use of Insecticides & Pesticides up to 70%
- Less Maintenance.
- Prevents whole micro irrigation systems from scaling.

**Conventional  
 Water Softener(Salt/Resin)  
 VS  
 E-Soft**

Parameter	Salt/Resin Base Water Softener	Electronic E-Soft
Creates soft water behavior	✓	✓
Uses salt, chemicals	✓	✘
Require continuous purchase of salt and resin	✘	Negligible
Has toxic sodium residue in water	✓	✘
Removes healthy, necessary minerals	✓	✘
Removes prior lime & mineral built up	✘	✓
Required weekly, monthly, yearly maintenance	✓	✘
Require continuous purchasing salt	✓	✘
Price	Very high	Reasonable
Life	5 Years	30 Years
