Integrated HSEQR Consulting Engineers, Scientists & Trainers

Report No: GCI/V/LAB/G094/24-RS/25-26/June-00/0644

Date: 23/06/2025

## **TEST REPORT**

(For the Month of JUNE-2025)

| Client Details                  |                        |             | Sample Details          |   |  |
|---------------------------------|------------------------|-------------|-------------------------|---|--|
| Name M/s. All water Enterprise. |                        | Sample Code | GCI/25/E25/DW2          |   |  |
|                                 |                        | nterprise.  | Location                | Trinity behind harni motnath,<br>Vadodara |  |
| Address                         | Vasna Bhayli, Vadodara |             | Quantity                | 500 ml                                    |  |
|                                 |                        |             | Packing/Seal            | Cap Seal                                  |  |
| Date of Analysis 18/06/2025     |                        | 18/06/2025  | Sampling Done By        | Client -                                  |  |
|                                 |                        | 10/00/2020  | Date of Sampling        |   |  |
| Date of Completion              |                        | 23/06/2025  | Date of Sample Received | 16/06/2025                                |  |
| Environmental Condition         |                        | 25°C ± 2°C  | Sampling Method         | APHA 1060                                 |  |
|                                 |                        | 25°C ± 2°C  | Reference Method        | APHA 24th Edition & IS 10500              |  |

WATER ANALYSIS RESULTS

| Sr.<br>NO | Parameters                 | Unit | Before<br>Treatment<br>Result | After<br>Treatment<br>Result | Test Method   |
|-----------|----------------------------|------|-------------------------------|------------------------------|---|
| 1.        | TDS                        | mg/L | 2350                          | 1025                         | APHA 24 <sup>th</sup> Edition 2540 C: 2023            |
| 2.        | pH @ 25 ºC                 | 8 87 | 7.45                          | 7.44                         | APHA 24 <sup>th</sup> Edition ssss4500-<br>H+ B: 2023 |
| 3.        | Particulate matter by LBPC | μm   | <2                            | <2                           | APHA 24 <sup>th</sup> Edition 2560 B                  |
| 4.        | Average cumulative counts  | μm   | 2135                          | 963                          | APHA 24 <sup>th</sup> Edition 2560 B                  |

**BDL: Below Detectable Limit** 

Note:- The average particle size of untreated water is 2135 µm, which can cause scale buildup inside pipelines, reducing flow efficiency, increasing pump power consumption, and shortening pipeline lifespan; however, after treatment, the particle size is reduced to 963 µm, significantly minimizing scaling, thereby enhancing pipeline durability and energy efficiency.

END REPORT.

Results relate to the items tested and sampled only.

Reports cannot be used as evidence anywhere including judiciary purpose without our prior permission.

Sample will be retained till 15 days after the date of issue of Report
